

TeleScan® Wins 2023 Fierce Life Sciences Innovation Award

Austin, TX (November 29, 2023) – TeleScan®, a telesonography-as-a-service provider, is the winner of the Technology Innovation category in the Fierce Life Sciences Innovation Awards 2023, produced by Fierce Biotech and Fierce Pharma. The awards showcase innovation that is driving improvements and transforming the life sciences industry.

TeleScan connects healthcare providers and their patients with remote sonographers to make prenatal ultrasound more accessible. Launched earlier this year, TeleScan has served more than 1,000 patients and enabled providers to reduce examination times, report turnaround times, and time until the next available appointment.

“It’s exciting to see our early results get so much attention,” said Blanca Lesmes, CEO of TeleScan. “I’m thrilled by our progress in making TeleScan not just viable, but a hugely positive solution for patients, providers, and healthcare facilities. Maternal care is lacking in our nation, especially for minority and rural demographics, and TeleScan is part of the answer to making prenatal care more accessible and identifying high-risk pregnancies early.”

“We are so pleased to showcase innovative companies that are pushing boundaries and driving us forward,” said Rebecca Willumson, SVP and Publisher of Fierce Biotech and Fierce Pharma. “Congratulations to the 2023 class of winners.”

The full list of winners and finalists, as well as the Innovation Report, can be found [here](#).

About TeleScan:

TeleScan is a telesonography provider that connects healthcare facilities and their patients with remote, expert sonographers. By combining a facility's existing resources with our FDA-cleared and HIPAA-compliant technology, we can bring high-quality prenatal ultrasound care to all patients. Our partners include large hospital systems, private practices, and federally qualified healthcare centers in underserved locations across the U.S. To learn more, visit telescan.ai.
